1 Big Changes

1 Listen and Discuss

Read the texts below. Find the sentence that talks about the most important event in each.
After you finish reading, write the effect that each important event had.

The world is constantly going through changes. Look at some important events that have changed the world and affected the lives of many people in modern times.

THE UNIFICATION OF THE KINGDOM OF SAUDI ARABIA

King Abdulaziz, a gifted leader, was responsible for the legendary event that marked the beginning of modern Saudi Arabia. In 1902, he regained Riyadh, beat the city garrison, took the Masmak Fortress, and established his headquarters in the city. He expanded Saudi Arabia to include all of the Hijaz, Makkah and Madinah and united all the tribes. On September 23, 1932, the Kingdom of Saudi Arabia was officially established, with Arabic as the national language and the Holy Qur'an as its constitution. King Abdulaziz initiated the building of infrastructure and set Saudi Arabia on the road to modernization.

THE UNITED ARAB EMIRATES - UAE

The federation of the United Arab Emirates, known as UAE, consists of seven sheikhdoms; Abu Dhabi, Ajman, Dubai, Fujairah, Ras Al-Khaimah, Sharjah and Umm Al Quwain. The city of Abu Dhabi in Abu Dhabi is the capital. The UAE was officially established in 1971. It came after the discovery of enormous oil reserves in Abu Dhabi in 1958. The UAE dirham, a single national currency, was launched in 1973. The oil revenues as well as income from other commercial activities have been used to develop a thriving economy and social infrastructure. Abu Dhabi now hosts its own grand prix at Yas Marina Circuit and Dubai is home to the tallest building in the world, the Burj Khalifa.

THE SPACE RACE

The Russians launched the world's first artificial satellite, *Sputnik 1*, on October 4, 1957. Next, *Sputnik 2* went up into space on November 3. The Americans won the race to land on the moon more than ten years later—with *Apollo 11* on July 20, 1969. "This is one small step for a man, one giant leap for mankind," said astronaut Neil Armstrong, the first person to walk on the moon. His Royal Highness Prince Sultan bin Salman Al Saud flew on *STS-51G Discovery* in June 1985 as the representative of the Arab Satellite Communications Organization (ARABSAT). He was the youngest person to fly on the Space Shuttle at the age of 28.*

THE COMMUNICATIONS REVOLUTION

The first communications satellite, called *Telstar*, was launched from Cape Canaveral on July 10, 1962. This marked the start of rapid transmission of TV signals over wide areas. What we take for granted today—satellite television, cellular telephones, wireless and high-speed Internet connections, and so forth—were part of science fiction only 40 years ago. Teenagers today are the first real citizens of the digital world. Unlike their parents, they have grown up in a world in which electronic delivery of information and entertainment is natural and more accepted than conventional forms like the newspaper, tape, or film.

1 Big Changes

9 Reading

Before Reading

Think about Saudi Arabia's progress and growth since its foundation in 1932 until now.

- What are the most significant advances or changes?
- How do you think these will develop or progress in the future?

Progress towards the future

All successful changes start with a vision. Successful visions are based on strong pillars. The first pillar of our vision is our status as the heart of the Arab and Islamic worlds. We recognize that Allah the Almighty has given to our country, a gift more precious than oil. Saudi Arabia is the Land of the Two Holy Mosques, the most sacred sites on earth and the direction of the Kaaba (Qibla) to which more than a billion Muslims turn at prayer. We will expand and further develop our country to ensure that that Muslims from around the world can visit the Holy Sites.

The second pillar of our vision is our determination to become a center for global business. We will develop the economy to encourage investment from other countries and international businesses.

The third pillar is **transforming** our unique geographical location into a global **hub** connecting three continents, Asia, Europe and Africa. We will use our geographical position to improve trade and transport to and from our country.

Although our country is rich in its natural resources, our real wealth lies in the ambition of our people and the potential of our younger generation. They are our nation's pride and the architects of our future. We will support young people in finding jobs and training. Our vision is built around three themes: A **vibrant** society, a **thriving** economy and an **ambitious** nation.

The first theme is vital to achieving the vision. We believe in the importance of a vibrant society. Members of this society

live in accordance with the Islamic principle of moderation, are proud of their national identity and their ancient cultural heritage, enjoy a good life, are protected by caring families and are supported by a social and health care system. The government is committed to supporting families and the education and wellbeing of their children. In the second theme, a thriving economy provides opportunities for all by building an education system that meets the needs of the market. It creates economic opportunities for small **enterprises** as well as large corporations. Therefore, we will develop and **diversify** our economy to create job opportunities.

Our third theme-an ambitious nation-is built on a responsible, **transparent** and high-performing government. We will apply efficiency and responsibility at all levels. We will also prepare the right environment for our citizens, businesses and society to be responsible and take the initiative in facing challenges and seizing opportunities. We are confident about Saudi Arabia's future. With all the blessings Allah has given us, we cannot help but be optimistic about the decades ahead.

The future of our country is one of huge promise and great potential. Our precious country deserves the best. Our vision, grounded in our country's strengths, will deliver this stability and create a brighter future for our country and our people.

B. 1. How do most people communicate nowadays? How do you communicate with your friends and relatives? Discuss and make notes.

2. Read the text and compare with your ideas. Underline new information.

How the Internet has changed the world

It all started in 1969 when a student at the University of Stanford tried to log in to a university computer, from his home in Los Angeles. This gave scientists the idea that people could communicate through computers, instead of posting letters or talking by telephone.

Many scientists researched ways to try and do this. In 1990 Tim Berners-Lee and Robert Dailliau succeeded. They created a system for people to communicate with each other and find out information using computers. In the beginning, they called it the "Worldwide Web". They changed the name to "The Internet" later. The Internet started with a few basic websites and e-mail. At first, it was used mainly by scientists, governments and the military. Now, more than 30 years later, there are more than four and a half billion users of the Internet (about half of the world's population!).

E-mail, instant messaging and online video calls connect people across the globe for business, education and social purposes. Social networks allow people to communicate with large numbers of friends, and upload pictures and videos to share.

Information is accessible to everyone online. All you need to do is 'Google' a few key words and you get numerous sites and documents. We can also now learn via the Internet. People can attend university or courses online and obtain academic and professional qualifications.

C. Read the text and make notes in the chart about the important facts and the changes the Internet has brought about.

	Major Change in Communication	Major Change in Education	Major Change in Information
Fact that caused or initiated change			
Advantages			
Disadvantages (your view)			
Situation in the past (the way things were)			

D. Think about an event that has brought about major changes. Make notes in the chart about the event and the impact it has had on your country.

	Impact 1	Impact 2	Impact 3
What was the event?			
When and/or where did it happen?			
Did the event have a positive or negative impact on your country?			

2. Use the information you put in the chart to write a short discursive essay about the event and the impact on your country.
3. Exchange and comment on each other's work. Correct and re-write.

2 Careers

1 Listen and Discuss

Read the three texts below. Find the sentences that say exactly what each person does in his job.

Dream JOBS

Have you ever wondered how people get really cool jobs? Imagine you've been working at the same job for a long time, and you're getting tired of the daily grind. Maybe you can get inspiration from these lucky people and do something creative and interesting.

CAR SCULPTOR

Working with clay is normally associated with artists, not with the automotive industry. However, some of the world's largest automobile companies have a permanent staff of sculptors to help them make designs for cars and visualize ideas for future products. Salim Saif went to art school and was going to be an artist, but he ended up as a sculptor for General Motors. Salim spends his days using his hands to craft anything from miniature clay models to actual-size car sculptures. He's been working for the company since he left college, and he and his team have helped design the latest models to come off the showroom floor.

FOOD SCIENTIST

When someone says that he is a laboratory scientist, what immediately comes to your mind? You probably think of a white lab coat, sterile surroundings, a microscope, and test tubes. But that is not the case of Matthew Duval. For the last three years, he's been working as a food scientist for the makers of Tasty's ice cream, and he has created several new flavors. He's constantly searching for new combinations of flavors to keep the products fresh and interesting for the company's customers. In his lab, he experiments with different

products and flavors until he gets them just right. And, of course, he always gets to taste the results. One part of Matthew's job involves market research. He's good at presenting his new products to customers and getting their input.

ANIMATION DESIGNER

Animation has been in high demand in advertising, special effects, video games, and films. Animators need to have artistic ability, creativity, storytelling ability, technical skills, scientific and technical knowledge, and the ability to work with others.

Animators need to understand character development and be able to portray character emotions in a convincing way. As computer generated imagery (CGI) technology is used in both live action films and animated movies and interactive games, it has become necessary for designers to have scientific and technical knowledge. Animation projects involve many people who work as a team. Clear and effective communication with team members and clients is crucial.

2. Read the text. Find the sentences that talk about the future and the ones that talk about the past.

A Vision of the Future

The French writer Jules Verne wrote several books in the late 1800s. In them, he wrote about the future. He asked, "What will life be like at the end of the 20th century—one hundred years from now?" In one of his adventure novels (*From the Earth to the Moon*), his characters traveled to the moon in a rocket. In another novel (*20,000 Leagues Under the Sea*), his characters dove through the depths of the ocean in a submarine in the shape of a whale. In a novel titled *Paris in the Twentieth Century*, Verne described a city with skyscrapers of glass and steel, high-speed trains, gas-powered automobiles, and a global communications network. Space rockets and submarines and other things in his novels didn't exist in Verne's time, but many of the inventions that Verne imagined became reality by the end of the 1900s. That's why people call Verne a visionary.

Comments Made in the United States in 1955: Right or Wrong Predictions?

Read the predictions below. Find the sentences that talk about the future.

"I seriously doubt that fast food restaurants will ever catch on."

"Have you seen the new cars coming out next year? It won't be long before \$1,500 won't even buy a used car."

"Did you see where some baseball player just signed a contract for \$75,000 a year just to play ball? It wouldn't surprise me if someday they'll be making more than the president."

"Soon all our kitchen appliances will be electric. They are even making electric typewriters now."

"I'll tell you one thing, if things keep going the way they are, it's going to be impossible to buy a week's groceries for \$20."

"If they think I'll pay 50 cents for a haircut, forget it."

FYI

What a dollar bought in 1955 would take about \$9.65 to buy in 2020, because of inflation. The average baseball player makes nearly \$4.5 million a year. Today a haircut for a man costs an average of \$28.

 - a. What the car contained

 - c. 50 years later
 - d. They lived to see it
 - e. Everyone came to the event

The Tulsa Time Capsule

1 A crowd of people gathered outside the courthouse in Tulsa, Oklahoma, in June 1957, to witness the burial of an unusual time capsule: a brand-new gold-and-white Plymouth Belvedere car. The city leaders explained: "In exactly 50 years time, this car will be unearthed to show the world who we were and how we lived in Tulsa in 1957."

2 The automobile contained a flag, a city phone directory, an unpaid parking ticket, and the contents of a woman's purse: bobby pins, a ladies' powder compact, a plastic rain cap, several combs, a tube of lipstick, a pack of gum, a wad of tissues, \$2.73 in bills and coins. Five gallons of gas were also included, in case the combustion engine became obsolete by 2007 and no fuel was available.

3 The event attracted all sorts of people to Denver Avenue that day in 1957. Some thought that the idea of burying a new car was dumb; others thought it was brilliant. Raffle tickets (for the car) were sold. The person to guess the approximate population of Tulsa in 2007 would win. "I'll never be alive," said Teddy Baxter, aged 6. "Sure you will," answered his brother Henry, who was 19. "I might not be, but you'll be around for sure." Gene McDaniel, who was 20 at the time, thought: "In 2007, I'll be 70—I'll never make it."

4 The Plymouth was wrapped in protective materials and lowered into a concrete vault, which was supposed to withstand even a nuclear attack. It lay there for 50 years.

On June 13, 2007, the vault was opened, and the car was raised as thousands of people watched. The organizer of the event said: "Ladies and gentlemen, I present you Miss Belvedere." Unfortunately the tomb was unable to protect the car from moisture, and the vintage vehicle was covered in rust. The contents of a "typical" woman's handbag in the glove compartment looked like a lump of rotted leather. The microfilm that recorded the names of the contestants wasn't found. There was a bit of disappointment that the items were not in better condition. However, some items inside the time capsule were in good shape—they included a U.S. flag and some historical documents, such as aerial maps of the city and postcards.

5 The good news is that when the Belvedere was unearthed, Teddy and Gene were still alive. They never thought they would be here to see it happen. Someone present said, "It's our King Tut's tomb. It's like a fairy tale."

Discussion

Have you ever read about "hidden treasure"? When was it hidden and what did people find?

10 Writing

رابط الدرس الرقمي

www.ien.edu.sa

A. Answer the questions.

1. Read the title. Who do you think the keeper is?
2. Look at the photos. Where was the treasure hidden?

Keeper of hidden treasure

This is not a fairy tale, nor a scary story; it is the story of the discovery of 900-year-old treasure off the Korean shore.

A fisherman caught an octopus that had bits of blue pottery attached to its tentacles. At first, he thought they were shells. He caught more octopus and they all had shards attached to their tentacles. Finally, he brought up an octopus that had a whole plate caught on its tentacles.

That was when he realized that he had made an important discovery; he had heard about shipwrecks with ancient pottery, in the area. So he contacted the museum as soon as he got back.

An urgent underwater exploration led to the discovery of thirty, perfect examples of 12th century bowls, thanks to the octopus family.

3. Read the story and make notes in the boxes.

Who found the treasure?	
Where did he find it?	
How did he find it?	
What was the treasure?	
What did he do with it?	

B. Think of a story about "hidden treasure" that you have read or heard. Make notes in the chart below and then use your notes to write the story.

In 1817, a steerable front wheel was developed by Baron Karl von Drais in Germany, and in 1839, the first pedals were introduced by Kirkpatrick MacMillan, a blacksmith from Scotland. The first bikes had large front wheels because it was believed that the bigger the front wheel, the faster the bike.

Omar: I'm turning off my alarm.

Adnan: What on earth is that?

Omar: It's the new flying helicopter alarm. It runs on rechargeable batteries! It's the best alarm clock I've ever had.

Adnan: How does it work?

Omar: You see, the top part, in other words the flying part, is placed on a base. The alarm is set and when it goes off the top part flies off the base. It is made to fly in order to make you get up, catch it, and put it back on its base.

Adnan: And why is it here?

Omar: Well, you know how it is when you have a lot to do at work and you also have to attend meetings. I don't have an assistant so if I am working on an important project I forget. The flying alarm can solve the problem. I set it in time for any meeting or conference that I have and I don't have to worry. What do you think?

9 Reading

Before Reading

1. What words do you think of when you read the words “credit card”?
2. Read the text and write sentences to show the history of the credit card. Use the timeline below.

The World of Plastic

1 Can you imagine a world without credit cards? Until the 1950s, a world without the use of cash was simply inconceivable. Today an economic universe without plastic would be impractical. Whether it's for business or for leisure, the credit card is used to pay for goods and services from New York to Beijing.

2 It all started in 1949 when Frank McNamara scheduled a business dinner in a New York restaurant. Before he left for the dinner, Frank changed suits. When the waiter presented the check, Frank realized that he had left his wallet in the other suit. The embarrassing situation was solved, but that night Frank asked himself: “Why should people be limited to spending what they are carrying in cash, instead of being able to spend what they can afford?” A year later, Frank returned to the same restaurant in New York. When the check came, Frank handed the waiter a small cardboard card, a Diner's Club Card, and signed for the meal.

This event is known in the credit card industry as the “First Supper.” Soon the concept of “charging it” was picked up by merchants as an alternative form of payment to the use of cash. By 1952, the Diner's Club Card was accepted by thousands of businesses across the United States, and it became a status symbol for those who carried it.

3 The Diner's Club Card soon became a cultural icon. Hollywood cashed in on the “charge-it craze” with

the 1962 movie, *The Man from the Diner's Club*. In it, an employee at Diner's Club issues a credit card to a well-known gangster and has to get it back in order to keep his job. The Ideal Toy Corporation joined in the trend when it created a board game called the *Diner's Club Game*. The idea of the credit card quickly expanded outside the United States. The Diner's Club Card became the first international charge card in 1952 with franchises in Canada, France, and Cuba. In 1955, Western Airlines became the first airline to accept the Diner's Club Card. Ten years later, the card was accepted by every airline in the United States. Diner's Club expanded its services to hotels, car rentals, and other businesses.

4 Other famous international credit cards have been created such as American Express, Visa, and MasterCard. There are hundreds of local bank cards, department store credit cards, supermarket credit cards, and so forth around the world.

5 In 1984, the first card members rewards program was created, aimed mostly at business travelers. It gave valuable benefits and special privileges to loyal users. Now many reward programs offer free airline miles and discounts on hotels and other products.

6 Ever since a businessman forgot his cash in 1949, people have used credit cards. An entirely new business was created that revolutionized the way the world has paid for goods and services ever since.

1949: Frank couldn't pay for dinner because he forgot his wallet.

The computer and the Internet. Good or bad?

Have we become dependent on computers and the Internet?
Thread Started on Jan 12, 2023, 4:55 PM

Computers have become an integral part of our lives. They make day to day tasks easier and save time. Does that make us incapable of doing simple tasks without the aid of the computer? Can we still use hard copies of dictionaries or books? Can we write by hand? I think most of us can. Not having to do things in a conventional manner allows more time for thought and creativity.

Re: Computer and the Internet. Good or bad?
Reply #1 on Jan 12, 2023, 5:21 PM

I agree that computers and the Internet are valuable tools that provide access to information quickly and efficiently. On the other hand, literacy appears to be affected in more ways than one. People don't bother to learn how to spell correctly or write by hand. They sometimes rely on the computer to correct their grammar and spelling. I know my handwriting has suffered since I started word processing.

Re: Computer and the Internet. Good or bad?
Reply #2 on Jan 12, 2023, 7:43 PM

Does it matter if we are not all adept at handwriting? At the end of the day, technology is here to stay. If computers can help us write, why should we write by hand? Isn't it better to invest that time on learning?

Re: Computer and the Internet. Good or bad?
Reply #3 on Jan 13, 2023, 4:01 PM

Learning is the big issue here. Does technology foster learning or does it provide ready data that do not promote critical thinking? And what about math? There seem to be more and more young people who are unable to calculate. They are completely dependent on computers.

Re: Computer and the Internet. Good or bad?
Reply #4 on Jan 13, 2023, 9:40 PM

The Internet has contributed greatly to learning, through the wealth of information it can provide, on a wide range of topics. In addition, it has made it possible for people to study through e-learning. In other words, the Internet has brought schools and universities to people, wherever they might be, provided that they are connected.

Re: Computer and the Internet. Good or bad?
Reply #5 on Jan 16, 2023, 5:12 PM

Our teacher says that the Internet prevents us from developing our memory, an important aspect of learning. He thinks that easy access to information prevents learning, simply because we do not have to make any effort to memorize. I don't agree. Memorizing facts is not an effective way of learning. There are a lot of people who are unable to do that, yet when you talk to them or let them present a viewpoint or solve a problem, you realize they are highly intelligent and articulate. I am getting confused. Can someone help?

2 Reading

Before Reading

1. Look at the photo of ancient Egyptians. What do you notice about their eyes?
2. What did they use for the heavy eye make-up that is so noticeable in the wall painting?
3. What was the purpose of the make-up?

EYE MAKE-UP IN ANCIENT EGYPT

Ancient Egypt's striking eye make-up protected wearers against eye disease, according to French scientists. The make-up was concocted with a mixture of lead and lead salts and it was used to adorn the eyes and ward off evil!

Philippe Walter, who co-headed a team of scientists from the Louvre museum and the CNRS (National Center for Scientific Research, France), pointed out that this observation had been made in the past by ancient Greeks and Romans who believed that the make-up had medicinal properties, but the team wanted to determine the exact composition and how it worked.

Contrary to widely held belief that lead is harmful, the team demonstrated that in very low doses lead does not damage cells. The research was carried out with a tiny electrode, to observe the effect of Egyptian lead chloride on a single cell. It proved that lead produces a molecule that activates the immune system which in turn attacks bacteria in case of an eye infection. So, make-up was used as a disinfectant and more importantly as preventive medication.

But whatever they may do
They won't be needing me
To take them by the hand.
Hoping they'll be kind
And praying that they'll find
A castle made of stone and not of sand.

Chorus

Will they be just what I want?
Will my dreams come true?
If I could predict
If someone knew—
I may not be there,
And when I am gone,
Life will go on
Without me.

My children will be grown some day,
But I might not be around
To hear what they will say.
I wonder if they'll understand
The things I've wished for them.
When they're on their own,
Will the path I've shown
Help them carry on,
And bring love and light
To their own home?

Chorus

Will they be just what I want?
Will my dreams come true?
If I could predict
If someone knew—
I may not be there,
And when I am gone,
Life will go on
Without me.

As you drive along a busy road, you notice a car without a driver! You blink to clear your eyes, and wonder whether you're losing your mind! It's the driverless car; a robotic vehicle that can travel to a predetermined destination without human intervention. All you would need to do is sit in the car and enjoy the ride! Would you do it? Would you travel in a driverless car? Is it science fiction or reality?

You are spending the night in the desert. Everyone else is sound asleep but you are still awake, enjoying the starlit sky. It's a cold but peaceful night. None of the usual city sounds echo in the background. So you snuggle in your sleeping bag and close your eyes. All of a sudden you are startled by a high pitched sound! Someone or something is whistling! You sit up, look around but don't see anyone. Then you hear the sound again, along with a soft patter of something landing in the sand. What do you think it is? Is it a dream or reality?

They are very real and highly popular in entertainment, but they are also used in education. They are used by many colleges and institutions for educational purposes. Many businesses and industries use them to train their employees and executives. They are used for military strategy and flight training. Astronauts train on them for a long time before they participate in real missions.

Can you guess what they are? What is your opinion about them?

You walk into a food store to buy some yogurt and cheese. You notice that the packaging is different from what you are used to. It's very attractive with bright wrapping. A customer has just bought some frozen yogurt in a biodegradable bag. He takes out one of the round, pearl-like shapes and bites into it as you're about to warn him not to eat the wrapping! He seems to be enjoying it. He then uses a small spoon to dip into the shell, eat the rest of the contents as well as the wrapper! Is the wrapping edible, or does the customer suffer from a condition that urges him to eat things that would normally be considered inedible? What do you think? Is it science fiction or reality?

Before the days of the computer-aided design (CAD) and lasers, models and prototypes required days or even weeks of hard work to make and were very costly. Improvements and modifications could not be incorporated easily, often resulting in the loss of business. An 80s idea, called rapid prototyping led to the development of a type of machine, similar to an inkjet printer, that made it possible for designers to make their own rapid prototypes. The machine uses plastic, instead of ink or powder, and builds up a model one layer at a time from the bottom upward. Do you know what this type of machine is called? Is it science fiction or reality?

They claim that autonomous vehicles will be safer because human error will no longer be an issue.

So, according to this, you could print out any object on a 3D printer. Is this a fact?

I'm not sure how useful this type of thing would be.

I think it's a great idea. If wrappers were edible there would be less waste and litter.

They are certainly useful but they cannot replace the real thing, can they?

I think they can to some extent, or they wouldn't be used for pilot training.

It's a fact. Some countries have already decided to allow them on the road.

I can't see myself crunching on a wrapper. Can you?

Common Accidents

The Most Common Causes of Automobile Crashes

An average of 20 Saudi Arabian residents die on the country's roads each day, according to a report by the Saudi General Directorate of Traffic. Approximately 1.35 million people die each year on the world's roads, or one person every 25 seconds!

- 1. Distracted Drivers:** Many accidents occur when drivers don't pay attention and take their eyes off the road. Many occur when drivers are talking on their cell phones, adjusting the radio or CD player, or reading maps or even newspapers or other documents.
- 2. Driver Fatigue:** Drowsy and tired drivers are a danger. They may misjudge traffic situations, fall asleep at the wheel, or go off the road. The most common time to encounter tired drivers is between 11 P.M. and 8 A.M.
- 3. Speeding:** Speeding increases the risk of crashing, reduces the amount of time necessary to avoid a crash, and makes the crash more severe if it occurs.
- 4. Aggressive Driving:** Here are some characteristics of aggressive drivers: They ignore the safety of others and take risks, such as by tailgating (driving too close to the driver in front), using rude gestures or verbal abuse, and not obeying traffic signs.
- 5. Bad Weather:** Heavy rain, snowstorms, sandstorms, high winds, and fog make driving more difficult. Drivers may have trouble seeing the road clearly. Drivers should slow down, and if necessary, pull off the road until the conditions improve.

Samir: So, how did you hurt yourself?

Jasem: I fell off my bike.

Samir: Really? So did I. My motorcycle skidded on a patch of oil on the road, and I crashed into a car. The last thing I remember was flying through the air and hitting the windshield. I woke up in the hospital.

Jasem: Were you wearing a helmet?

Samir: Yes, luckily I was. That's what probably saved my life. How about you?

Jasem: I was cycling in the park, so I didn't think I'd need a helmet. I don't like wearing helmets—they're uncomfortable and unattractive. This squirrel came out of nowhere. I swerved, lost my balance, and hit a tree. I got off lightly—only a few bruises and a bump on my head.

Samir: It was your **lucky day**!

Jasem: Yeah. That's too bad you broke both legs. You're going to be **stuck in** that wheelchair for a while, **I guess**.

Samir: **Look at it this way**—if I broke only one leg, there might not be enough room for all my friends to write their names on the cast. Hey, would you like to sign your name?

9 Reading

Before Reading

Read the events. For each event, write one sentence that describes the happy or unhappy ending that the people had.

Unusual Accidents and Deaths

Many people are interested in stories of unusual accidents—some of these stories have happy endings, but some, unfortunately, have unhappy ones.

UNHAPPY ENDINGS

According to the legend, the ancient Greek playwright Aeschylus was killed when an eagle dropped a tortoise on his head. The bird was trying to break the tortoise's shell on a rock in order to eat it. Aeschylus was bald, and the eagle thought the unfortunate man's head was a good rock on which it could break the shell.

An eight-foot tall ostrich was seen weaving through heavy traffic on a Saudi Arabian highway, near Abha. One of the drivers filmed the scene and uploaded it on the internet. No one tried to stop and catch the 180-kg bird that was taller than humans and ran at almost 70 km per hour. It had probably escaped from a farm and ran into heavy traffic instead of the wild.

Some people worry about being hit from things falling from outer space. There is only one person in all recorded history who has been killed by a meteorite—Manfredo Settala. The tragedy happened in 1680.

Ahmad Ali lost his eight-year-old son in a drowning accident at a friend's house. His son had been invited to join other children at a friend's house to play and swim in the pool. According to the invitation a lifeguard was going to be present. The young boy was really excited and begged his father to let him go. So, Ahmad Ali picked him up from school and drove him to his friend's house before 1:00 p.m. That was the last time he saw him alive.

HAPPY ENDINGS

A German soldier was riding in the back seat of a World War I plane when the engine stalled as a result of an unusual gust of wind. He fell out of his seat while the plane was high above the ground. As he was falling, the plane's engine started again, and he landed back in his own seat. The pilot was then able to land the plane safely.

Bob Hail jumped out of an airplane in November 1972, but his main parachute failed to open. His backup parachute also failed. Bob dropped about 3,000 feet (900 meters) at 80 miles (128 km) per hour and hit the ground face first. After a moment, he got up and walked away with only minor injuries. It was an amazing escape.

In September 2007, Phil Lamattina escaped death when he was driving at over 300 miles (500 km) per hour in a drag race in Brisbane, Australia. Phil was racing down the track when his car became airborne, split in two, and burst into a fireball. He was knocked out, but he survived. Although he was in the midst of the ball of fire, Phil was burned only on the tip of his finger. When his brothers later showed him the video of the accident, Phil couldn't believe he was watching himself—and that he had such a lucky escape.

Railroad worker Phineas P. Gage was working with some dynamite when it exploded unexpectedly. A bar that was 3 feet (1 meter) long and that weighed 13 pounds (6 kg) went clear through his head. He remained conscious, but was unable to see out of his left eye. After a while, his sight returned, and he fully recovered.

THE ACCIDENT

It was morning and my older brother was driving me to school. Suddenly, a speeding car crashed into us at an intersection and threw us into a telephone pole. I was, fortunately, wearing my seatbelt but I still managed to hit my face on the dashboard.

I was unconscious for some time and woke up as I was taken out of the car and put into an ambulance. The driver of the car that hit us was also in the ambulance. I heard him say he was 90 years old. I was 15, scared to death and likely to end up with a scarred face for life. I started yelling "Please stop driving! Stop driving!" I could not stop.

I don't know what happened to the man, I never saw him again.

I was released from hospital two weeks later. Since then I have always been a cautious driver and advised others to be careful.

Do you look up web sites that give advice? What do you search for?

The screenshot shows a web browser window with the URL <http://helpsite4u.com>. The website has a yellow header with the text "You've got questions? We've got answers." and the logo "HelpSite4U" with the URL <http://helpsite4u.com>. Below the header is a navigation bar with buttons for "Leisure", "Health", "Eating", "Friends", "Travel", and "School/College". A mouse cursor is pointing at the "School/College" button. Below the navigation bar, there is a paragraph: "This site has been developed to help people who have problems and don't know who to turn to for help. We hope you will use it and make the right choices for life!". Below this is a section titled "Saying NO to junk food" with three bullet points: "You want to stay healthy? Then you'd better stay away from fast food. Turn it down!", "The labels *fast food* or *junk food* refer to food that contains a lot of fat and is cooked in an unhealthy manner. Younger people tend to eat more junk food because of peer pressure.", and "You should keep your principles and your sense of self-worth. You deserve healthy and nutritious food. So in the case of peer pressure, just say NO!". To the right of this section is a "HOTLINE!" box with a phone icon and text: "For help at any time, talk on the phone with one of our counselors. Click [here](#) for more information." Below the "Saying NO to junk food" section is a "Weight Control" section with a photo of two men in traditional Saudi attire. One man is speaking, and the other is listening. The speaker says: "I have to lose weight and run faster. What should I do?". The listener responds: "You'd better stop eating junk food and exercise more." To the right of the "Weight Control" section is an "Anorexia" section with text: "Anorexia is an eating disorder that affects people's appetites—usually because of emotional problems, stress, or pressure. This condition is quite common among teenagers, but it can also affect adults. The slim look is usually considered attractive by teenagers. So, in order to keep their weight down, these young people simply avoid food. Nowadays, there is a lot of information available about anorexia and a number of awareness-raising campaigns to prevent people from becoming anorexic."

Fitness means “being in good physical condition—healthy and strong” and is usually associated with exercise. That is not the whole picture. In order to keep fit, you have to eat well, sleep well, and generally feel good about yourself.

Mohammed: I'm feeling down. It's all these exams coming up. There's so much pressure and everyone's calling me all the time, to ask about this or that. When I'm out they're constantly calling me on my cell phone to ask for help. If I say I can't speak, they want to know what time I will be available and where I will be so they can come over or call again. Why don't they call someone else?

Hussain: You ought to talk to them and explain that they can't expect you to be free to help everyone all the time. You have work to do as well.

Mohammed: I tried talking to them, but they say I'm being selfish, and looking out for myself and nobody else. Oh, I give up!

Hussain: They probably think you don't need to study; you know it all anyway.

Mohammed: Seriously? Of course, I need to study. I don't remember everything we've done. Do you get calls from classmates?

Hussain: Sure. They're pretty nervous about calling you, so they call me first to find out what kind of mood you're in. To be honest, I would be really happy if you talked to them. I don't know what to say to them anymore.

9 Reading

Before Reading

1. Write down what you think are the main ingredients that attract people to junk food. Share your answers with the class.
2. List the factors that normally lead people to become addicted to junk food. Share your answers in groups.

Good eating habits contribute to health and fitness and make you feel strong. "What is so good about a diet of vegetables and fruit combined with lean meat, preferably chicken or fish?", you might ask. If you are very tired, hungry, and upset there is nothing better than a juicy beef burger with fries or a giant pizza, you think. That's probably true if your brain has gotten used to the pleasure felt when tasting junk food. But is it good for you? Does it help you stay fit and control your weight? How do you feel after you've had a meal? Are you sure it's not time to break the habit?

Breaking the habit—Getting healthy

The following is a checklist to help you decide if it's time for you or a friend to change eating habits. Just ONE "warning sign" should be enough reason to take action.

- ✓ You shouldn't think 'junk food' the minute you start feeling hungry. There never is an acceptable reason for this. It is a definite sign of a habit that is on the way to becoming an addiction.
- ✓ Comfort eating is usually associated with junk food and in general, high calorie food that is also high in carbohydrates [starch and sugar] and saturated fat. If you run to the nearest fast food chain every time you feel down, you know it is out of control.
- ✓ A healthy, nutritious meal does not have to be bland and boring. When pushed you can picture appetizing dishes that do not contain fries or fatty ingredients but you still prefer to get hold of a beef burger or a pizza. You know it's not the best food for you. You know that you are going to feel sleepy and tired after you have eaten.
- ✓ To be honest, healthy is a relative term. It all depends on what your alternatives are. There are 'healthier' choices you can make even at a fast food restaurant. You might, for example, order salad as a side dish instead of a second helping of fries. You could avoid condiments such as ketchup or mayonnaise, or eat a chicken burger. You know all this, you have promised yourself to do it next time you are there, but somehow it never happens. You keep on insisting that those dishes take longer to prepare.

But breaking a habit can leave you feeling down. Don't worry, this is quite common; and it shouldn't last very long if you stick to your decision to give up junk food.

- You ought to decide on your own if it's best to cut down on the amount of junk food you eat, gradually over a period of time, or whether it's best to stop altogether for some time.
- You should allow yourself some time to do it successfully
- You shouldn't give up simply because you were with friends and joined them for dinner at a fast food restaurant, or because you helped yourself to a few fries.
- Pick up some menus from different restaurants and read them carefully, paying attention to the ingredients of each dish. Then highlight the dishes that you find interesting.
- You might go to the supermarket and wander around making a list of all the food and ingredients that you find attractive.
- If a friend insists on offering you junk food, turn down the offer and treat yourself to something nice. The important thing is to regain control and only eat junk food when nothing else is available or very occasionally for a change.
- Make a list of all the things you enjoy doing but had to give up because you gained weight or do not feel energetic enough. Decide what you would like to do again and when. Set yourself goals that are achievable and enjoyable. Treat yourself right!

After Reading

- A.** Answer **true** or **false** according to the information in the reading.

 - ___ If you cannot stop eating junk food immediately, there is no hope of ever breaking the habit.
- B.** Complete the following sentences based on the reading.
- Breaking your own rules occasionally should not make you _____.
 - If a friend insists on treating you to fast food _____.
 - You should decide if it's better for you to _____.
 - If you feel tired and drowsy after you eat, then you'd better _____.
 - Breaking a habit is difficult and makes you feel down; therefore you shouldn't _____.

- Do you agree with the advice in the reading?

10 Writing

A. Consider the following and discuss with a partner.

1. Do you have friends who live in another city or country? Do you write to them? Do you know anyone who does?
2. Would you like to move to another place? Why?
3. What would you miss if you moved to another town, city or country?
4. Read the letter and identify the problem.

Dear Faisal,

I hope you have had a good school year. I am sorry I haven't written sooner but it has been very busy and difficult for all of us. Moving to a different city has not been easy. I miss you and all our friends.

I have made some friends at my new school but I am still considered 'the new student' so I never get invited anywhere. I tried to invite some of my classmates during the holiday but only one turned up. The rest didn't even call to let me know that they couldn't come.

I have tried to be nice to everyone and give them and myself time to get to know each other but nothing has come of it. I have been feeling down for some time and I can't concentrate. My grades have dropped and I have gained a lot of weight because I get no exercise. They won't let me play football with them.

I feel like giving up on everything. All I do is go to school, come back home, do my homework, and play video games on my own. I don't know what to do.

If you have any tips, please write and tell me what to do and what not to do. I can't think straight any longer.

Hope to see you soon,

Nasser

5. Read the letter again and make notes in the organizer.

The problem:	
The cause of the problem	Your advice or solution to the problem

- Put yourself in the person’s place and **acknowledge feelings**.
- **Do not judge** the person, try to **help**.
- **Do not dictate** or patronize. Show empathy with the person. Make helpful suggestions about how they can improve their situation.
- Always close on a **hopeful note**, e.g. I am sure things will get better soon; they usually do.
OR I believe you will deal with this in your own wonderful way; I’ve seen you do it before.

Make sure you use words and expressions such as:

I am really sorry to hear ... / I understand how you feel/ I would feel the same way/ I don’t understand why people do this sort of thing...

I think, maybe, you should ... / How about ... ing/ Have you tried ... / I would ... but then again, you know best/ It’s hard to imagine what it feels like .../ I wouldn’t like to be in your place ...

FROM SMOKE SIGNALS

Email: Keeping in Touch

From the Stone Age to the present, people have shown a desire to send messages to one another over long distances.

In ancient times, according to one story, a chain of fires on mountaintops was used to relate the news of the fall of Troy to people in Greece. In the past, native people in the Americas used smoke from fires to transmit messages. They developed a code—in which certain combinations of smoke rising had special meanings. For example, two parallel columns of smoke indicated the successful return of a war party.

The ancient Greeks established lines of signal towers at mountain-tops. At each one, a large fire was lit to transmit a signal to the next tower, and in this way, information was passed on through the land. Also, almost anything that makes a noise has been used for signaling. A kind of drum talk is still used in Central Africa today, although few who are not natives have been able to understand it. The sender uses a drum that can produce a high or low tone. Because the local dialect alternates in these tones, the sender is able to simulate speech with the drums.

In modern times, people have communicated by letter, telegraph, and telephone. But no one method has become as widespread as quickly as the use of email. The first email message took place in 1971, and according to its sender, Ray Tomlinson, it was probably the following: "QWERTYUIOP." What was significant about that? Nothing, really. This is just the top row of keys on an English-language keyboard. Tomlinson was just testing out the system and using a nonsense message. He had no concept that he was going to start a revolution in communication.

Tomlinson was one of a group of scientists who were working on developing better computers. The scientists at his site were able to send a message to a "mailbox" on the computer on their site. Other scientists could view the messages in the mailbox. But there were other computers at other sites where scientists were working on the same project. Tomlinson's idea was to figure out a way to deliver messages to mailboxes on those remote computers. He used the @ sign to identify messages that were headed out of the local machine to the more distant ones. That was the start of the emailing systems that we still use today.

At first, the number of people on email was small, but by the end of the 20th century, there were 263 million email boxes. In the 21st century, that figure has grown to over 4 billion, and the functions of email services in the future will become more and more diversified. And text messaging on cell phones is also increasing, so people can, in effect, be in constant touch with people who are long distances away.

9 Reading

Before Reading

Winning money as a prize could bring the winner problems. Do you agree or disagree? Give reasons. Make a list of problems you think might be mentioned in the article below. Then scan the article and see if it mentions the same problems.

MONEY: *A Blessing or a Problem?*

There's a great deal of truth in the saying "A fool and his money are soon parted." For some people, winning millions is the answer to their problems, but the reality is more like a nightmare for others. The money can strain relationships with family, friends, and neighbors, and can even eventually end in bankruptcy. It's often very hard for a winner to handle the pressure and all those millions.

Most prize winners are not used to having money and making financial decisions. They are vulnerable and become easy prey to people who want to take advantage of them. Winners may lose large sums on investments they know nothing about, or they might go in with a partner who may not know how to run a business.

William "Bud" Post won \$16.2 million. "I wish it never happened. It was totally a nightmare," says Post. He tried to help his family, but things didn't work out. A brother was arrested for trying to kill him, hoping to inherit part of the money. Post went into a car business and a restaurant with his children, but the two ventures were failures. He eventually went broke, and now he lives on \$450 a month and food stamps.

For many people, sudden money can cause more than financial disaster. The most notorious case of poor use of prize money in recent times is that of Michael Carroll, who won £9.7 million (\$17.1 million) at the age of 20. Michael spent almost his entire fortune in 18 months on four homes, a holiday villa in Spain, two convertible BMWs and two Mercedes Benz cars, several quad bikes, and a stake in a football team. Sometimes money can make people insane, but that isn't the case with Michael Carroll. He was a nuisance before, and decided to continue being a

nuisance. Michael has been in constant trouble with the law, and has paid thousands of dollars in fines for vandalism. Reports say that he is nearly broke.

But not everyone is like Michael and Bud. Bob Bradley, an 83-year-old great-grandfather, won \$6.17 million in May 2006. Besides giving a huge amount to children's charities, Mr. Bradley has spent his fortune helping to make the dreams of his family and friends come true. He has rejected flashy cars, expensive vacations, and a move to a luxury mansion in favor of handing out his jackpot to others. He said: "I haven't kept any money for myself. I can just give my family all they ever wanted. I've had my life more or less, so this win is for their benefit."

So if you ever win a big prize, seek an advisory team to help you make important financial decisions—and a good psychiatrist to help you keep your sanity.

After Reading

Simon: Right now, I need some time to settle down and think. I know one thing, for sure, though; I will not be watching any shows for a while. I'd like to go somewhere and rest and then probably decide if I'm going to go back to college or start my own business.

2 Reading

Before Reading

Read the three articles and underline the details that tell you about the history of each game.

PLAY BALL!

FOOTBALL

Forms of football have been played for thousands of years by various civilizations. As far back as 2500 B.C.E., the Chinese played a form of the game and called it *Tsu Chu*. The natives of the Pacific Islands played the game using their hands and feet, and they used coconuts and animal bladders as balls. The Inuits of northern

Canada played football on ice and used balls filled with caribou hair and grass. Other Native Americans played on fields that had enough space for 1,000 players to be playing at the same time, and matches usually lasted for more than one day. The games were so rough that the players often got broken bones. In Mexico and Central America, people invented the rubber ball and played in courts 40 to 50 feet (12 to 15 meters) long surrounded by walls several feet high. In the middle of each wall, there was a stone with a hole in the middle or a wooden ring, and the idea was for players to hit the hard rubber ball through the hole or ring.

But it was not until 1863 in England that the first set of rules was put together to make football the game it is today. Football was spread throughout the world by British sailors and settlers, and all major innovations in the game such as leagues, professionalism, and international matches originated in England.

BASKETBALL

In 1891, Dr. James A. Naismith, a physical education teacher at a school in Springfield, Massachusetts, in the United States, was asked to create a game that could be played indoors during the harsh winters. So Naismith put up two peach baskets on opposite walls of the gymnasium and got his class of 18 students to play a game of “basketball.” The team that dropped the ball into the basket more times won. At first, a football was used, but in 1894, it was decided that the ball should be 32 inches (81 centimeters) around and weigh 17.6 ounces (500 grams). In spite of all the changes that have taken place since then in the game of basketball, the size of the ball has remained the same, but the weight has increased to 21 ounces (600 grams).

The baskets used in early games had the bottoms in them, and after each goal, someone had to climb a ladder in order to get the ball out and put it back into play. In 1906, open baskets were introduced, which allowed the ball to pass through, and as a result, the pace of the game became faster. In the beginning, no backboards were used either. Therefore, fans sitting behind the basket would push away the ball when the opponent was going to score. Also in the early days, each team was made up of nine players. It wasn't until 1897 that the five-player team became official.

VOLLEYBALL

Volleyball was officially included in the Olympic Games in 1964. It began as an indoor sport, created by William G. Morgan, a physical education director, in 1895. The game borrowed characteristics from tennis and handball and was originally designed for older players.

Volleyball is played on a court, divided by a net. The game begins with a team player serving the ball; tossing it in the air and hitting it with his hand or arm, over the net and into the other team's court. The receiving team must prevent the ball from falling on the ground. Each team is allowed to touch the ball 3 times before hitting it back, over the net. Individual players may only touch the ball once. Each turn after serving is called a "rally."

Each team tries to ground the ball on the opponent's court and win the rally. If a team commits a fault it loses. Common faults include a double hit by the same player, grounding the ball outside the opponent's court, missing the net or touching it during the game; a *net foul*, and a *foot fault*, when the foot of the player who is serving crosses over the boundary line or the court.

Players have to observe a considerable number of rules and develop techniques such as *spiking* and *blocking* that require mastery of the *vertical jump* so players can hit the ball when it's above the top of the net.

- Yasmin:** Amal, look at that beautiful, silk gown in the window!
- Amal:** I agree. It's very elegant. Would you like to go in and have a look?
- Yasmin:** Can we? I'd love to try it on. We don't have much time, shops will close in less than an hour, so let's hurry!
- Assistant:** Good morning ladies. How can I help you?
- Amal:** We'd like to see that gown, please.
- Assistant:** Is it for you?
- Yasmin:** It's for me, actually. But I need a larger size, don't I?
- Assistant:** I'm not sure you do. I think you should try a smaller one.
- Yasmin:** Isn't this small enough?
- Assistant:** I'm afraid not. It's an XL. Small is the right size for you. Would you like to try it on?
- Yasmin:** Yes, please.
-
- Yasmin:** What do you think? It's the right size isn't it?
- Amal:** Yes, it's a perfect fit. It looks great on you. You might need to have the hem taken up a little.
- Assistant:** We'd be happy to do that for you.
- Yasmin:** Right! We'll take it! Do you accept this type of credit card?
- Assistant:** Actually, we'd prefer cash.

Teenage Stress

Definition

Stress—the mental and physical strain or the nonspecific response of the body to any demand made upon it. Stress is a chemical reaction that takes place inside the body when there is a basic need to adapt to or resist changing internal or external influences. It is a response meant to return the body and mind to a state of equilibrium and balance.

The Causes of Stress

Although adolescence is often viewed by parents as a carefree period of life, some studies show that teenagers experience the most stress of all people. They can experience stress related to money, family problems, self-esteem, acceptance by their peers, getting accepted into college, choosing a career, and pressure to do well in school, sports, or clubs.

According to experts, one of the main reasons for stress is that childhood has gotten shorter, and the perception of children has changed. Since TV is available to all audiences, children can get messages that were probably meant for adults, and the dividing line between childhood and adulthood is less and less clear. Children do not play as many of their own games as they used to, and most of their games and sports nowadays are those preferred by adults. Youngsters wear similar clothing to that of adults, and they use adult language that was once never to be heard from a child. Young people these days are under tremendous pressure to achieve, to please, and to succeed. They are expected to adjust to social changes that past generations have never had to deal with. The demands made on preteens and teens by modern life have definitely increased the level of stress.

Tips for Dealing with Stress

All humans experience stress. It is a necessary part of life. The response to stress is what often needs to be controlled. A person's feelings, attitude, and outlook on life affect his or her ability to deal with stress.

- You should avoid unnecessary worry. Thinking about a problem in order to arrive at a solution can be positive, but constant worry is not constructive, and it accomplishes nothing. It usually just makes situations more stressful.

- Read and listen to the Qur'an. It will help refresh your heart and mind. Remember that prayer and patience can combat stress and anxiety.
- Be thankful for what you have and start each day on a positive note. Remember that each day is a gift. Thank Almighty for the gift of life and greet the day with optimism and gratitude. Remember that you are not alone.
- Become better organized. Plan activities a step at a time so that parts are accomplished. This gives you more self-esteem and more reasonable deadlines.
- You should be aware of the symptoms of stress. Some symptoms are:
moodiness; insomnia or other sleeping disorders;
lowered body resistance to colds, flu, or other

diseases; preoccupation with negative/angry thoughts or feelings; unusual behavior patterns; loss of appetite, or eating disorders such as anorexia or bulimia.

- When you know you have a problem with stress, try to solve it one step at a time. Part of the problem could be trying to do too much at once. You should take it in easy stages.

Conclusion

Stress doesn't need to be negative. Some doctors say that you should laugh and smile more frequently to help deal with stress. When you laugh and smile, your body relaxes, and the result is an overall positive reaction. Don't forget that it is the effort that counts more than the result.

- Customer:** You don't seem to understand.
- Salesperson:** Of course, ma'am, I'll try to help. Can you give me the jeans?

9 Reading

Before Reading

1. Have you ever heard of Murphy's Law? Find out if any of your classmates know about it.
2. Read the article and underline all the sentences that talk about something that went wrong.
3. Write a sentence to state what the writer is trying to say.

MURPHY'S LAW

You invite your friends over to watch a final football match on TV. There are plenty of juices in the refrigerator, you have bowls filled with your favorite snacks on the table, and you are all set to watch the big match. You turn on the TV set, and all you get are fuzzy images on the screen. Could this be Murphy's Law at work? Murphy's Law states: If anything can go wrong, it might go wrong!

Similar situations occur all the time. When you're in a hurry to open the door and you try several keys on the key ring, the last remaining key is usually the one that works. When you're late meeting your friends and they're all waiting for you at the mall, all the traffic lights are red. When you get in a line at the supermarket, you find you've chosen the slowest one, and it just doesn't move. Is this bad luck or coincidence? According to British physicist Robert Matthews, it's neither one nor the other. He explains that our selective memories tend to remember the bad episodes more readily than the things that usually work out. Also, the law of probability is more against us than in our favor in many situations. For

example, in the supermarket with five cashiers, the chances of getting the fastest lane are 20 percent, and 80 percent for a slower lane.

Matthews became a popular scientist when he proved that a piece of toast doesn't necessarily fall on the floor on the buttered side. BBC Television gathered 300 people to throw pieces of buttered toast up in the air and observe on which side they fell. Half fell on the buttered side, and half didn't.

Just remember that you cannot blame Murphy's Law for everything that goes wrong. If the hot water runs out while you're taking a shower, it's probably because the hot water heater needs to be fixed. If you miss the bus and are late getting to school, it's probably because you didn't wake up early enough. And if you lose all your files on the computer, let's be honest— it's your fault for not having a backup of your files.

Captain Edward A. Murphy

Captain Edward A. Murphy, Jr., was an engineer at Edwards Air Force Base in the United States. In 1949, he was working on a machine to measure the heartbeat and breathing of pilots. But something was malfunctioning in the equipment as the result of human error. Murphy blamed the lab technician and said, "If there is any way to do it wrong, he will." One person's failure can bring a whole project crashing down. And Murphy's view was that some failure or something negative will typically happen. Murphy's phrase became popular in all areas to explain the failures of everyday things.

After Reading

Answer the questions about the reading.

1. What does the example of the final football match illustrate?
2. What does Murphy's Law state?
3. According to Robert Matthews, how does the law of probability work against us in the supermarket line?
4. Why did Matthews do the buttered bread experiment? What did it show?

Discussion

1. Give examples of Murphy's Law using your own experience.
2. Do you believe in Murphy's Law? Why, or why not?

Dear Sir,

- 1 I purchased a set of earphones at your store three days ago. According to your promotional material, any item that is faulty and is returned within 24 hours, is fully refunded and a discount voucher is offered for future purchases, as a courtesy to the customer.
- 2 I attempted to use my earphones the day I purchased them and found out that one of the cables had not been connected. I therefore, called your Customer Service Department and was advised to return the earphones as soon as possible.
- 3 I drove to your place of business immediately and tried to do as advised. Unfortunately, however, I was told by the assistant that the earphones could only be returned if the packaging was intact.
- 4 Allow me to wonder how one is supposed to find out if an item is faulty or not, if it is kept in its packaging. And if that is the case, it would seem fair to include it in your promotional material in large block letters, instead of conveying the wrong message and misleading people.
- 5 I regret to inform you that following this incident, I will refrain from using your retail outlet in future and will have to report you to Consumer Protection.

Yours sincerely,

A displeased former customer

When Ray and Judy Fausset arrived home on the afternoon of September 23, 2003, they discovered to their amazement that a meteorite had crashed through their two-story house. Neighbors said that they had heard a terrific noise, and two people had actually seen the fireball when the meteor hit. The meteorite had penetrated

through the Faussets' roof and the house's two floors, and it had ended up in the crawl space under the house, leaving debris and fragments along its path. A total mass of 42.5 pounds (19.3 kilograms) from the meteorite was recovered from the Fausset house. 10 Writing

- A. 1. How many remote controls do you have at home? What kind of devices are they used for?
2. Read the article and identify the different stages that remote controls went through.

Years/decade	People involved	Main characteristics	Functions

SECTION A

THE DAILY READING JOURNAL

WEEKLY EDITION

We tend to think of remote controls as 'new' devices. However, what we now take for granted at home or at work has been developed over a very long time.

One of the earliest examples of remote control was developed in 1898 by Nikola Tesla, who demonstrated a radio-controlled boat to the public during an electrical exhibition at Madison Square Garden. In 1903, Leonardo Torres Quevedo presented the Telekino at the Paris Academy of Science. It consisted of a robot that executed commands transmitted by electromagnetic waves and was a pioneer in the field of remote control. The first remote-controlled model airplane flew in 1932 and by

the late 1930s, several radio manufacturers offered remote controls for some of their more exclusive models.

The first television remote control was developed in 1950. It was called "Lazy Bones", and was connected to the television set by a wire. A wireless and then an ultrasound remote control were developed in the mid-50s but neither was reliable.

More sophisticated television remote controls were introduced in the late 70s, but they had a limited number of functions, sometimes as few as three: next channel, previous channel, and volume/off. Remote controls, with a wider range of functions, were finally launched in the 80s and became an immediate

success. For the first time, viewers no longer watched programs just because they did not want to get up to change the channel. They could also channel surf during commercials, or turn the sound off.

By the early 2000s, the number of remote controls increased along with the number of electronic devices. Consumers needed a remote for each device. This led to the development of universal remote controls that can be used with different devices. Imagine controlling everything around you with the touch of a button on one single remote control! Is it wonderful or scary?

3. Did you find any new information in the article? What did you learn?
4. Read the article again and decide what the focus/topic of each paragraph is. Work in pairs and compare your answers. Then report in class.

- Use past tenses and passive forms to relate history
- Include your own and/or others' views on the event

11 Form, Meaning and Function

Independent Clauses with *And*, *But*, *Or*, *So*, and *Yet*

An independent clause expresses a complete thought and can stand alone as a sentence.

A meteorite crashed through their two-story house.

Two or more independent clauses can be combined with coordinating conjunction words, such as: *and*, *but*, *or*, *so*, and *yet*. When a sentence includes two independent clauses joined by a coordinating conjunction, use a comma before the coordinating conjunction.

Neighbors said they hear a terrific noise, **yet** no-one reported it to the police.

Mr. and Mrs. Fausset's house was destroyed, **so** they moved.

The Past with Dependent Time Clauses

We can talk about a past event using a time clause with *when*, *as soon as*, *before*, *after*, *while*, *until*, and *since*. When the time clause comes before the main clause, use a comma between the two clauses.

When they arrived home, they discovered to their amazement that a meteorite had crashed through the roof.

Expressing Enthusiasm with Intensifiers and Adjectives

	Gradable Adjectives		Non-Gradable Adjectives
very	scary	absolutely	terrifying
really	good	really	amazing
quite	interesting	quite	fascinating
	small		tiny
	big		massive

Note: We can use *really* with both kinds of adjectives. It means *a lot*. But when we use *quite* before a gradable adjective it means *a little*. When we use *quite* before a non-gradable adjective, it means *completely*.

A. Complete the witness report with the correct form of the verb in the past. Compare with a partner.

PD Witness Report

While I was walking (1. walk) to work, I _____ (2. hear) a lot of people shouting and then I heard a very loud crash. Before I heard the crash, I _____ (3. see) lights above me and I _____ (4. hear) a humming sound. When I _____ (5. arrive) at the park, a really large crowd _____ already _____ (6. gather) around something which _____ (7. fell) out of the sky. People _____ (8. be) quite terrified because they _____ never _____ (9. see) anything like that before. Some people _____ (10. call) the police and some other people _____ (11. run) away. When I saw that the object was made from metal, I _____ (13. realize) that it _____ (14. be) probably part of a weather balloon or a satellite.

B. Write an account of an event you have witnessed. Use time clauses, conjunctions, adjectives and intensifiers. Then tell your story to the class.

*UFO = Unidentified Flying Object

Conditional Sentences with Present and Future Forms

Use conditional sentences with *if* to talk about real causes and results. In these cases you can also use *when* in place of *if*.

Present Facts

Use the *simple present tense* in both clauses.

When a meteoroid **enters** the earth's atmosphere, chemical interactions and gasses **cause** it to heat up and **form** a fireball.

Future Facts

Use the *simple present* in the *if*-clause and the *future* with *will* in the result clause.

If you **don't leave** now, you **will be** late.

May/Might

Use *may/might* in the result clause to suggest something is possible, but not certain.

If you see a meteorite falling through the sky, it **may be** a stony meteorite or it **might be** an iron meteorite. The third type of meteorite is a stony-iron meteorite, but these are very rare.

Express Necessity and Lack of Necessity:

What should I do if I see something strange in the sky?

You **need to** video or photograph the object, if you have a camera phone.

You **have to** call an expert to get their opinion.

You **don't need to (needn't)** worry. Strange things fall out of the sky on a regular basis all around the world!

C. Complete the sentences. Use the simple present tense and **will, may or might** in the second clause.

1. When you _____ (heat) water to 100 degrees Celsius, it _____ (boil).
2. If they _____ (climb) up to 4,000 meters, they _____ (need) oxygen.

4. If we _____ (get) this HD television, we _____ (see) the game better.
5. When you _____ (mix) flour and water, you _____ (end up) with batter.

D. Read a college professor's notes on what to do if you find a meteorite. Write his advice in full sentences using modals to express necessity or lack of necessity.

💡 If you think you have found a meteorite, you must photograph it.

What should you do if you find a meteorite?
photograph the rock
describe the exact location
measure the rock if possible
report the find to the Meteoritical Institute
don't panic — it's very common for rocks to fall from outer space onto Earth

1. Look at the pictures and write as many words as you can think of for each.
2. Read each paragraph and underline the words that name something in the picture.

Looking Back

Inventions and Discoveries That Changed History

We often wonder if things might or could have been different. Would the world be a better place? What are the advantages or disadvantages of different inventions?

The Wheel ▲

If the Sumerians hadn't invented the wheel in 5000 B.C.E., they couldn't have moved heavy loads. Six thousand years later, the Mayans and Incans in the Americas used the round shape in their architecture, but they had no wheels.

Airplanes ▲

If the Wright brothers hadn't invented the first successful airplane, people might still be traveling long distances on ships, and there wouldn't be as much contact among people on different continents. The Wright brothers first flew in an engine-propelled plane in 1903.

Oil ▲

If people hadn't discovered a lot of sources of oil, cars that run on gasoline wouldn't have become so common. The first commercial oil well drilled in North America was in Oil Springs, Ontario, Canada in 1858.

Computers ►

If we didn't have computers, a lot of work would still be done with paper and pencil, and people in their homes wouldn't be able to be in contact with the entire world. The first PC was introduced by IBM in 1981.

Electricity ▲

If electricity hadn't been discovered, people would probably still be using candles or gaslights. Thomas Edison developed the first incandescent electric light bulb in 1879.

Penicillin ▲

If Dr. Alexander Fleming hadn't discovered penicillin in 1928, millions of people would have died from infections. However, the widespread use of penicillin as an antibiotic did not begin until the 1940s, during World War II.

Life's Regrets

At one time or another, we all look back and wish we had done things differently in our lives. The following are some typical situations. Mark the ones you've said or done. Discuss with a partner.

- ☐ If I'd studied harder, I would have passed that test.
- ☐ I should have said what I thought about her hairstyle, but I didn't want to hurt her feelings.
- ☐ I should have bought that thing last year; now prices have gone up.
- ☐ If I had been more careful, I would have avoided the accident.
- ☐ I should have told the security guard that I saw someone breaking the lock.
- ☐ If I'd known the trip was going to take so long, I would have taken another route.
- Other after-thoughts? _____

3 Grammar

Should Have + Past Participle

Use *should have* + past participle to talk about regrets. Use this form to talk about things you wish you had done or hadn't done.

I **should have said** I was sorry. (... but I didn't say I was sorry)

I **shouldn't have done** that. (... but I did that)

Conditional Sentences: Hypothetical Situations in the Past

Use *if* + past perfect + *would have* + past participle to talk about things that didn't happen in the past and had a result in the past or to talk about things you would have done differently.

If I **hadn't found** my book, I **would have been** in trouble. (I found my book, so I wasn't in trouble.)

If I **had studied** harder, I **would have passed** the exam. (I didn't study hard, so I didn't pass the exam.)

Use *if* + past perfect + *would* + (*not*) base verb/*be* + *-ing* to talk about things that didn't happen in the past and have a result in the present.

If I **hadn't learned** English, I **wouldn't understand** you. (I learned English, so I understand you.)

If we **had won**, we **would be celebrating**. (We didn't win, so we aren't celebrating.)

Note: *I'd* = *I + had* or *I + would*

If I **d** (= I had) **been** more careful, I **d** (= I would) **have avoided** the accident.

If with Could and Might

Use *if* and *could/might* + past perfect to talk about possibilities and missed opportunities.

If I had gotten a job last summer, I **could have saved** more money.

If she had left work earlier, she **might have avoided** traffic.

A. Read the situations, and make sentences using **should have/shouldn't have**.

3. Rita didn't feel well, but she didn't want to go to the doctor.

E. Work with a partner. What **would**, **could**, or **might** you have said or done in the following situations? Compare your ideas with other pairs.

1. It was late at night when Ken remembered he hadn't taken the garbage out. He was already in his pajamas, but he wasn't going to get dressed again just for that. So he went outside quickly, threw the bags into the trash can, and rushed back to the house. When he got to the front door, he realized he had locked himself out. He was busy trying to break into the house when a police officer saw him.
2. You saw an old friend at the airport that you hadn't seen in years. You went up to him or her, greeted the person, and started talking about old times. Suddenly you realized that you had made a mistake.

Ibrahim: *You mean*, things I should or shouldn't have done? Yeah. I guess there are a few. How about you?

Faisal: I wish I had done things differently. I missed some good opportunities because I was too immature. I should have listened to my parents. They wanted me to go to college, and I actually had the grades, but I wanted to go get a job and *go out into the world*.

Ibrahim: Well, you did very well for yourself. You have your own business, and you don't have a boss *breathing down your neck*.

Faisal: But I have lots of responsibilities. I wish I'd taken a course in business management. Now I have to employ someone to do the work I could be doing.

Ibrahim: Well, it's never too late. You can still go back to school. *As for me*, I got my master's degree, and *I had my mind set on* a career. But then I got married and had children.

Faisal: So you had to choose between the job and family?

Ibrahim: No, I work hard and I am able to take care of my family.

MARIO'S

ADVICE COLUMN

Dear Mario,

I am writing to tell you a story. It's too late for you to tell me what to do now, but maybe you could tell me what I should have done. Your advice might be useful to others in similar situations.

My best friend borrowed some money from me when we were out shopping at the mall, two weeks ago. I was happy to let him have it, as I had saved my allowance over a few weeks and had more than I needed. He wanted to buy a DVD. Then later I loaned

him some more money because we decided to eat at a pizza restaurant. The total, including the DVD, came to \$25. I don't mind helping out a friend, if I can, so I didn't think much of it.

Last week, we were at the mall and I needed to buy some shoes. They were rather expensive and I asked him if he could give me some of the money I had loaned him. He gave me a very funny look, threw a twenty-dollar bill at me, and walked away.

I was really upset. So, I decided to call him when

I got back. He told me that he never wanted to have anything to do with me again. He said I had embarrassed him at the shop and that I shouldn't have asked him for the money in public. He thought I had done it on purpose because I didn't trust him.

I am really devastated. I've lost my best friend over \$25. What do you think I should have done? Should I have just not said anything? Would that have been the right thing to do?

—A Confused Friend

MARIO'S

Dear Mario,
I'm a limo driver, and people leave all kinds of things in my limousine—scarves, packages, and even shoes. Last Saturday night I picked up this wealthy man at his hotel and drove him to a prestigious charity awards ceremony. The man must have been a millionaire, judging by the way he was dressed. The next day, when I was cleaning the inside of the car, I noticed something shining.

The man's gold and diamond pocket watch must have fallen out of his pocket, and it slipped behind the seat.

So I called the hotel where the man was staying, explained what had happened, and arranged to return the watch. The man was extremely grateful. He told me that it was a valuable family heirloom, given to him by his grandfather, and he went on to praise my honesty. Then he opened his wallet,

took out a ten-dollar bill, and gave it to me. I refused, but he insisted. Ten bucks! Can you believe it?

I should have kept the watch. Since then I've been thinking of what I could have done with the money. I could have bought my own limousine or started my own business.

Did I do the right thing?

Wondering Why

- A. 1. Do you like sharing things with your friends? Why? Why not?
2. Read the advice column and answer the questions.
- Why was Sabah sad?
 - What happened with her friend? Why?
 - What is the column writer's advice?
3. Do you agree with the column writer? Why? Why not?
4. What would you have done if your friend had wanted to borrow something new that belonged to you?

Ask Mariam

Friendship is more important

Dear Sabah,

I am sorry you feel so sad about falling out with your best friend. I understand that she wanted to borrow your new bag before you had the chance to use it yourself. But as you say, she was invited to a wedding and she could not buy a new bag.

I understand that it is difficult, maybe even unfair, to let someone else use something that you have just bought or been given. But surely, friendship is more important, even if it requires some sacrifices. So I am afraid I will agree with what you think, you should have let her borrow the bag. She would have been happy and grateful to you and you would still be on good terms with your friend.

You say you do not like sharing your things with people because they might damage them. You could have asked her to be careful with your bag. The point is, however, to put things into perspective. What is more valuable to you, your friend or your new bag?

I would call and say I am sorry. I am sure she will understand and if she has not already been to the wedding, offer her the bag. You will both be happier.

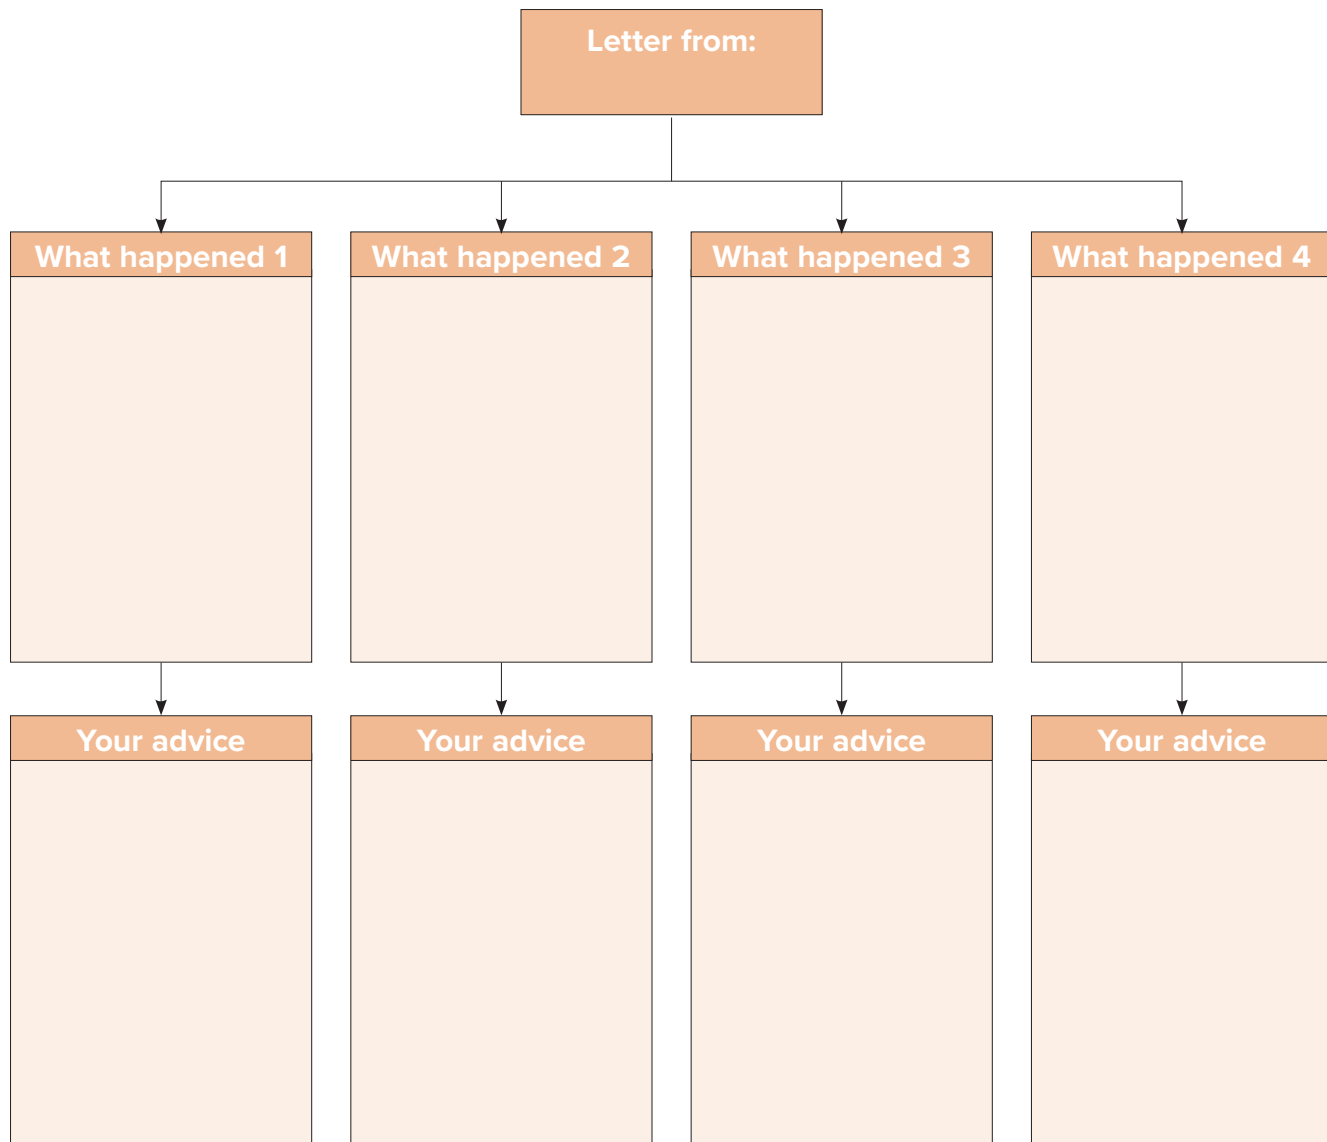

I hope it all works out.

—Mariam

5. Read the advice again. Notice the first part of each paragraph. Why do you think the writer has chosen to address the issue in this manner? What is the effect? Is the letter reprimanding or friendly? How would you feel if you were Sabah?

She called her brother at work. She knew he didn't like to be interrupted but she didn't know what else to do. Their mother's condition was deteriorating.

He sounded annoyed when he answered the phone; he was probably in the middle of a meeting. She apologized and stressed that she wouldn't have called if she hadn't thought it was urgent. His tone changed instantly. He asked her what was happening and if everything was all right. He wanted to know if the doctor had been notified and when he would be coming to see their mother. He sounded very stressed and worried.

She tried to reassure him by telling him that the nurse was at home looking after their mother and their aunt and that

everything was under control. He asked her to wait for a minute while he took care of something. She heard him speak to some people, probably clients. She heard the words "family emergency" and "health" and realized he was excusing himself. Then there was some noise of chairs being pulled, people moving, and a door opening and then closing. He came back and explained that he had had to interrupt the meeting and reschedule it for another day. She thanked him for having done that and before she had a chance to ask, he interrupted and asked her to hang up so he could be on his way home as soon as possible.

2 Reading

Before Reading

1. Read the title and write as many words as you can think of about it.
2. Read the text and underline the main event in each paragraph.

THE WAR OF THE WORLDS

- 1 On October 30, 1938, CBS Radio interrupted a live radio program to deliver an important announcement. It said that astronomers had detected blue flames shooting up from the surface of Mars. The broadcast returned to its program, but it was soon interrupted again. This time the news said that a strange meteor had fallen on a farm near Grover's Mill in New Jersey, and then CBS Radio switched over to continuous live coverage of the eerie scene around the meteor crash.
- 2 As the event unfolded, the terrified audience discovered that the meteor was actually some kind of spaceship. The reporter on the scene described the emergence of an alien from the spacecraft. "Goodness, something's wriggling out of the shadow like a gray snake," he said, in an appropriately dramatic tone of voice. "Now it's another one, and another. They look like tentacles to me. There, I can see the thing's body. It's as large as a bear, and it glistens like wet leather. But that face. It . . . it's indescribable. I can hardly force myself to keep looking at it. The eyes are black and gleam like a serpent. The mouth is V-shaped with saliva dripping from its rimless lips that seem to quiver and pulsate . . . The thing is rising up. The crowd falls back. They've seen enough. This is the most extraordinary experience. I can't find words. I'm pulling this microphone with me as I talk. I'll have to stop the description until I've taken a new position. Hold on, will you please, I'll be back in a minute."
- 3 The alien Martian crawled back into the crater, but re-emerged soon afterwards in a gigantic three-legged death machine, and quickly killed the 7,000 armed soldiers surrounding the crater. Then it proceeded across the landscape, joined by other Martians, blasting people and objects with heat rays, while releasing a poisonous black gas against which gas masks proved useless.
- 4 Listeners all over the United States began to panic. People filled the roads, hid in cellars, loaded guns, and even wrapped their heads in wet towels as protection from the Martians' poisonous gas. People desperately wanted to defend themselves against aliens. Although the radio broadcast had warned listeners four times that this was a dramatized version of H.G. Wells's story, *The War of the Worlds*, performed by Orson Welles and the Mercury Theater, people simply ignored those announcements. However, by the time the night was over, most people had learned that they were actually listening to a radio play. The fact is that the broadcast had reached approximately six million people and had produced a huge national scare at a time of the growing tension and anxiety leading up to World War II.

Why I work so long and hard?
Could you tell me why I do it?
Why I push myself some more?
Could you help me find the words?
Could you tell me what to think?
Could you help me see the reason
Why I still can't get an A?

If I had not tried,
I would have shown
That I didn't care.
They would have seen
My wish was true,
My will was real,
If only I
Had tried harder.

I should have done much, much better.
Should have corrected on the spot.
I should have asked someone to help me.
Should not have tried it all alone.
They might have noticed all my trials.
They might have listened to my plea.
Considered all that I'd forsaken
And handed that A right over to me.

I READING

Read about Ellis Island in New York.

Between 1892 and 1954, most people who came to live in the United States passed through Ellis Island. During that time, more than 12 million immigrants had this experience. Sometimes more than 10,000 people would go through Ellis Island in a single day. Most of these newcomers came from Europe and almost all of them came across the Atlantic Ocean by steamship. The trip was very difficult. The food was terrible, the ships were usually crowded and dirty, and the weather was usually bad so a lot of people got sick.

After the immigrants got off the ship at Ellis Island, they first had to pass a medical test. Sometimes they would wait for hours to see a doctor. If they were sick, they were usually sent back home. Over 250,000 people were sent home between the years 1892 and 1954. Some of those refused entry were young children, so one or both parents would have to go back with them. For these people, it meant their dream of living in the United States was over.

Today Ellis Island is a museum. You can see pictures of what the immigrants and the ships looked like. You can also listen to recorded interviews of some of the immigrants as they tell stories about what it was like to come to this country. In spring 2001, *The Statue of Liberty-Ellis Island Foundation* started offering a new service. You can now trace your ancestors' records. Among other things, you can find out the name of the ship they came on, how old they were, and what nationality they were. Of course there is a fee for this service, but for many people it is worth it to find out more about their family members' first days in the New World.

Read the sentences about Ellis Island. Write **T** for **True** or **F** for **False**.

1. _____ Ellis Island is in California.
2. _____ Immigrants came to Ellis Island and then had to pass a medical test.
3. _____ Today Ellis Island is a museum.
4. _____ Ellis Island was used between the years 1892 and 1954.
5. _____ Many people came to Ellis Island from Europe.
6. _____ The ships were clean and didn't have many people on them.
7. _____ The food on the ships was great.
8. _____ For most immigrants, the trip across the Atlantic was difficult.

F READING

Read the story, and answer the questions.

How many times have you been near a dangerous animal? How close have you been to a poisonous snake? Well Tony Kepler raises killer snakes for a living, and he loves his job. He has been working with them since he was a little boy, and he's not afraid of them at all.

Tony's father has been handling snakes for twenty years, and he has taught his son a lot about them. Now Tony is able to make money from snakes. He collects the venom from rattlesnakes found in the western part of the U.S. Venom is the liquid that comes out of the snake's fangs when it bites. Tony sends the venom to a lab, and the lab makes it into antivenin. When a poisonous snake bites a person, a doctor gives that person antivenin. This antivenin keeps the venom from killing the person. Tony has been earning his living this way for five years.

Tony's father has handled nearly 1,000 snakes in his lifetime. He has taught hundreds of people how to hold snakes. He has also shown them how to feed snakes and how to get venom from them. Not everyone can get used to the idea of picking up a snake. Many people heard scary stories about snakes when they were children and have been afraid of them ever since. Tony has been trying to educate people about the positive things snakes do. For one thing, they help control the rat and mouse population. Snakes are also very clean and quiet, and they rarely disturb humans.

Tony's job is very different from a lot of jobs, but it is a really important one. Without venom collectors, many people would be in real danger and some would die.

1. How long has Tony been working with snakes?

2. How long has Tony's father been handling snakes?

3. How many snakes has Tony's father handled?

4. How long has Tony been earning his living from snakes?

5. Why is Tony so comfortable around snakes?

Looking Ahead

The future is hard to see and plan—even for experts.
Read the quotations below:

- “It will be years—not in my [life] time—before a woman will become prime minister [of the United Kingdom].” Baroness Margaret Thatcher said this in 1974, just five years before she became the first female British Prime Minister.
- “There is no reason anyone would want a computer in their home.” Ken Olsen, who started Digital Equipment Corporation, said this in 1977.
- “It will take at least 200 years to put a man on the moon.” Experts at the magazine *Science Digest* wrote this in 1948.

Yet some predictions are amazingly accurate. At about the same time that *Science Digest* made its prediction, British writer Arthur C. Clarke predicted a moon landing and missed the date by just one year. What are some of Clarke’s more recent predictions?

- Space travel will soon become common.
- Within the next 1,000 years, we will be plugged into an Internet that lets us download the libraries of distant planets.

Will these predictions come true? No one knows right now. But there is one thing we can be quite certain about: Science and technology has become more and more important and it will affect our future in very powerful ways.

Will the end result be positive, helping people live longer, happier lives? Or will it be negative, perhaps destroying the environment through pollution and global warming?

The answer will probably depend on how we decide to use science and technology. For this reason, it is important to think carefully about the future. Maybe we can’t predict it accurately, but we need to think about what could happen and how our lives will be in the future.

1. Find one prediction that did not come true.

2. What did Arthur C. Clarke accurately predict?

3. What is another prediction that Clarke has made?

4. What is one thing about the future that we can be sure of?

5. Will science and technology have a positive or negative effect on the future?

The Psychology of Advertising

Instead of making claims about products, advertisements today often try to give people reasons to buy the products. This is where psychology—the study of how people think and behave—comes in.

Psychology is important to the way ads look. Advertisers use stories (e.g., the woman who made her family happy by buying the right soup, the man who was well-rested for his meeting after flying on the right airline) because people like to put themselves in stories. They use pictures more than words because we fantasize and daydream in pictures.

Psychology is important to the stories that ads tell. According to psychologists, people in our society have certain needs. Ads try to show people that they can meet these needs by buying products. Here are some of these needs and ads that appeal to them:

Friendship. We like to be part of a group of friends. Ads show us that if we drink a certain juice, we will belong to a group of friends who drink it too.

Success. A car goes up a driveway to an obviously expensive house. The person driving this car has had a lot of success in life. If we buy the car, we will too.

Escape. Sometimes our lives seem boring and we'd like to escape for a while. Car ads that show people driving a car to the top of a mountain do this. So do the McDonald's ads that tell us that we "deserve a break today."

Psychology even helps advertisers know who to advertise to. For example, children today have more and more influence on buying decisions. One mother says that her 6-year-old son kept asking her to buy a certain vacuum cleaner. He had seen the vacuum cleaner advertised during a children's TV show.

1. What are two things advertisers use in their ads?

2. Generally, what do ads try to show people?

3. What are three of the needs that ads appeal to?

4. How are companies today getting children to influence their parents on what to buy?

G READING

Read the article.

Some Family Advice**Eppie Lederer and Pauline Phillips were identical twins.**

In 1955 Eppie Lederer won a contest. The prize was to write an advice column for the *Chicago Sun Times* newspaper. In 1956 Pauline Phillips began writing an advice column for the *San Francisco Chronicle*. Both columns became very popular and were soon being published in many newspapers. At one time, each column—"Ann Landers" and "Dear Abby"—had nearly 100 million readers around the world!

Eppie Lederer ("Ann Landers") and Pauline Phillips ("Abigail Van Buren") had a significant influence—on individuals and on important issues. For example, Phillips often called people who sounded very depressed in their letters. "They say, 'You're calling me?' After they start talking, I can suggest they get professional help." In this way, she saved people's lives. In 1971, when the U.S. Congress was reluctant to pass a law devoting money to cancer research, Lederer asked her readers to write letters. Congress received more letters than it had in its entire history—and passed the law.

Over the years, both columnists said that people's problems had remained basically the same. But the work was always interesting. Phillips said, "I can't wait to get to work in the morning." For one thing, there's no typical letter writer—women, men, teenagers all write about their problems. And, as Phillips said in response to a question, "There's no reason to make up anything. There's nothing weirder than what I get in the mail." Above all, they were committed to helping their readers.

Is it just a coincidence that these two famous advice-givers were twin sisters? Maybe—but maybe not. Jeanne Phillips, Pauline's daughter, helped her mother write "Dear Abby." She was a teenager when she started to help her mother. Margo Howard, Lederer's daughter, now writes an advice column called "Dear Margo." "It must be in the genes," says Jeanne Phillips, only partly joking.

Complete the sentences.

1. "Ann Landers" was really _____.
2. "Abigail Van Buren" was really _____.
3. _____ helped her mother write a column.
4. _____, who is _____
daughter, writes an advice column called "Dear Margo."

J READING

Read about the Morse Code.

International Code

There are a great many different ways to communicate today. We correspond by email, fax, letter, telephone, and cell phone. Every day, electronics and technology help make communication clearer and faster.

Samuel Morse developed the Morse Code in the 1840s. This type of communication uses a system of short electrical signals called “dots” and long electrical signals called “dashes” to communicate. For example, the international call for help is sent with these signals:

... / — — — / ...

You would say it like this: “Dot, dot, dot, dash,

dash, dash, dot, dot, dot.” Three dots stand for the letter S and three dashes stand for the letter O. When this SOS signal is sent, it means that someone is in trouble and needs help.

Before telephones, Morse’s system was used for rapid communication in Europe and America. Wooden poles carrying wires were set up so the electrical signals could be sent over the wires from one place to another. One person would tap out the code while a person in another place would listen to the message, write the code down, and translate it into letters and words. This “telegraph” system was widely used during the 1800s.

Although it seems slow now, compared to today’s technology, Morse Code is still sometimes used when emergencies occur today. This type of communication works best because it gets through interference better and works with very simple radios. Sometimes this is the only and best way to communicate during emergencies.

You can learn more about the Morse Code using the Internet. There are even schools that offer courses in its use.

One man's wishes are another man's burden

Omar was the youngest son of a poor family in Egypt. His father had worked hard all his life to support his family and build a small house for them at the end of a village. He wanted his three sons to get the education he had not been able to have himself, so they could have a better life. He would sit outside the house in the evening and dream about life in the big city. He wished for a modern flat, a new car, a small shop in a good neighborhood. He wished for the comforts of modern life. Omar would sit and watch his father, wishing he could help.

Imad was the youngest son of a wealthy family. His father was a very successful lawyer and his older brother was a doctor. The family lived in a large, modern flat in a prestigious neighborhood. They had three cars and a country house by the sea. Imad's father hardly spent any time with his family. He was always away seeing clients, preparing cases or having business meetings. When he came home, he would lock himself in his study and work. One evening Imad's father came home, walked into his office and shut the door. He sat at his desk, holding his head. He had lost everything. He had invested in a new production plant for electronic equipment. There had been a fire and the whole place had gone up in flames. The company lawyer had not paid the fire insurance, so the owners lost everything. He was going to lose his flat, the cars, his law firm, the country house. How was he going to tell his family? He wished he was a simple man with a small house in the village, with time to see his family and calm, quiet nights to sit and think.

Are you thinking of buying a used car? It isn't as easy as you might think. There are a few things you should know about and do before you spend any money. When you get to the car dealership, check the label on the car's window and read the price of the car. Check to see if they give you any other information about the car. Was it in an accident? Does it need to be repaired? If something goes wrong during the first six months, will the dealership fix it for you? These are very important questions to consider.

You need to look for other things, too. Did the previous owner take care of the car? Check to see how much oil is in the car right now. And most important, take the car for a ride. How does it drive on the city streets? How does it drive on the highway?

If you can, have a mechanic look at the car before you buy it. He will be able to tell you if there are any problems that need to be fixed before you buy it.

The last thing you need to do is read the contract very carefully before you sign it. If you aren't sure about something it says, ask the salesperson what it means. Make sure you get everything they promise to give you in writing. After you do all these things, you will be ready to buy the car. Oh yes, one last thing, remember to keep copies of everything you sign.

Answer the questions.

1. What do you need to do before you buy a car?

2. What are two things you need to check?

3. What is the most important thing you need to do when shopping for a car?

4. Where do you need to test drive your car?

5. What should you have a mechanic do?

6. What do you need to keep?

F READING

Read the story.

Patricia Polacco can certainly tell a very exciting story. I loved a book she wrote called *Meteor!* So when I saw that she was coming to our local library, I decided to meet her. At the library, she told us something about her life and then read us part of her book.

Patricia was born in Lansing, Michigan, and grew up in Oakland, California. When she was a little girl, she often stayed with her grandparents who lived in Union City, Michigan. One summer day, a meteorite fell from the sky, right into her grandparents' backyard! Before that, her grandparents had lived a very quiet life on their farm. Now things were different. They had so much to do. People came to see the meteorite. The university came to study it and analyze it. Her grandparents had never talked to so many people in their lives! Everything changed.

As you can guess, no one in the town had ever seen a meteor before! They were confused and didn't know what to do. Everyone had a different idea about what to do with it.

Patricia Polacco loves to tell the story about her meteorite and even today, she still carries a piece of the meteorite with her. When I met her, she let all of us touch it.

Answer the questions.

1. Before the meteorite, how had Patricia's grandparents lived?

2. What had Patricia's grandparents never done before?

3. What had the people in Union City, Michigan never seen before?

My son drove me home and I looked for my wallet all over the place, but I couldn't find it anywhere. And there was quite a lot of money in it. I was devastated!

And then my daughter, who was also looking, stopped and said. "Are you sure you didn't leave it at grandma's yesterday? I remember you taking it out and leaving it on the little table next to the door".

I don't know why I keep on doing things like that. I don't normally forget where I put things.

G READING

Does the brain ever sleep? Read the article and find out.

1. _____

Is dreaming a type of entertainment that the brain creates for itself? Is it a way of processing images and feelings that one has experienced? Is it a mix of experiences and associations? One might suggest that a dream is a series of images, sounds, and feelings that are experienced when one sleeps.

2. _____

Some researchers suggest that dreaming is a sign of your brain trying to sort out random emotions and memories, very much like processing information and classifying it. Part of the process could be compared to what defragmentation of our hard disk does in our PC. In other words, it's as if the brain classifies and tidies information, as it gets rid of junk and empty space. For example, panicking because you cannot swim in a rough sea might simply be due to the fact that the brain is stimulating the fear center as it calls up the memory of a dark sea with huge waves, which is not necessarily connected to the actual experience of trying to fight the waves. When we enter REM (Rapid Eye Movement) sleep, our body sends signals to different parts of the brain that are associated with memory and emotions. Although no one can tell with certainty what the purpose or origin of dreaming is, scientists suggest that it is the result of random, neuronal firing. Neurons are formed as we develop, and acquire knowledge and experience.

3. _____

Most people, approximately 90%, report that they dream in color. A small number, approximately 8%, insist that they never dream in color. Then again, quite a few people say that they sometimes dream in color and sometimes not. The fact of the matter, however, is that we all dream even if we cannot remember our dreams when we wake up.

4. _____

Scientists often monitor the brain's activity during sleep or monitor eye activity during the REM stage in an attempt to find out more about sleep and dreaming. But many questions remain unanswered. What is certain is that sleep is beneficial to our health and a necessity for rest and/or a healing process, even if our brain remains active at all times.

Use the questions as headings for different paragraphs/sections of the article. Then highlight the words or phrases that provide the answers and write them.

What does sleep research involve?

What is dreaming?

Do we dream in color?

What causes dreaming?

Omar: I think speed and pace.

K. Clark: Well, that's everything really. Would you like to watch a video with some comments from people who know you?

Omar: Ummm. I'm not sure. Are they good comments?

K. Clark: Yes, I think they are. A couple of your friends think you are sometimes too quick to jump to conclusions and misinterpret things, but they also mentioned that you never hold grudges against people. And here is your friend Alan...

Alan: Omar is really cool. He's a good friend and he always helps people, but sometimes I think he tries too hard. I mean, everyone knows he's a good athlete and a good student. He doesn't need prove anything. He has to learn to relax and enjoy his success. That's what I think ...

Smile, Paris!

In 2009, the residents of Paris took a bold but simple action—they decided to smile! There is a good reason for this. The Paris Tourist Board said that they were trying to get more travelers to visit Paris—the City of Light. They hoped that more smiles would help.

It's no secret that Paris has had a reputation among tourists as an unfriendly city. But for years, tourists still came. Paris was a must-see world city. Now that travel is more expensive, some travelers are thinking twice about visiting Paris. And the numbers show this. Seventeen percent fewer travelers visited Paris over the past year. The results of a recent online survey also shocked Paris tourist associations. It showed that participants thought that Paris was not just an unfriendly city, but that Paris was the most over-rated city in Europe, too. Many said that it was the high prices and unpleasant residents that made Paris the most over-rated.

It was clear that Paris was suffering from a bad reputation, and that this bad reputation was hurting the economy. The founder of a tourism association in Paris said that tourism had traditionally generated more than two million jobs and had been a major economic sector. He said that at this point all citizens needed to help change Paris's reputation.

And then it happened—the brilliant idea to have residents smile more. It's clear now that the idea is working. Tourists are seeing more smiles. For example, the tourist board has hired smile ambassadors and set up stands where these smiling people welcome tourists. The good will generated by the smile campaign is still growing. Recently, 100 roller-skaters formed a giant smile in the center of Paris in Place Vendome. The head of the tourist board said that there was nothing more inviting than a smile. And it seems to be true. Tourists not only want to visit the City of Lights, they want to visit the City of Smiles, too.

Write **T** for **True** or **F** for **False**.

1. _____ Paris is also known as the City of Lights.
2. _____ High travel costs had no effect on the number of visitors to Paris.
3. _____ Paris had the reputation of the most over-rated city in Europe.
4. _____ Tourism isn't very important to the Paris economy.
5. _____ No one truly liked the idea of the smile campaign.

- M** Read the news story about pandas. Then use the prompts to ask the reporter's questions. Write the answers to the questions.

Pandas

The lovable, cuddly-looking panda is one of the world's most popular animals. Unfortunately, it's also one of the most vulnerable species. Pandas live only in the dense bamboo areas of the misty, rainy forests of southwestern China. Today only about 1,900 pandas remain in the wild. The Chinese government and various conservation organizations are working to protect pandas in their natural habitat. They want to maintain a "bamboo corridor" through which pandas can move freely. Bamboo shoots and leaves account for 99 percent of a panda's diet. An adult giant panda eats up to 95 pounds (45 kilograms) of bamboo per day over a period of about 16 hours. So it is important to have a protected place with a lot of bamboo available.
